

Adding certainty and maximising outcomes

At Davis Langdon, an AECOM company, our specialists work together to advise public- and private-sector clients around the world.

Through Davis Langdon, an AECOM company, our clients have access to a comprehensive suite of construction consulting expertise. Combining the strength of the AECOM and Davis Langdon teams, our experts provide cost consulting, project management and associated specialist consultancy services.

Our specialists provide services that focus on reducing client risk, improving value and assuring outcomes on projects in all market sectors of the built, social and natural environments. We structure ourselves around our clients' sectors to provide industry relevant advice and it is our ability to provide specialists and not generalists that adds real value to a project — and sets us apart from our competitors.

Our practice areas include program, project and cost management and a range of specialist consultancy services, all designed to reduce risk and add value.

Our practice areas include, but are not limited to:

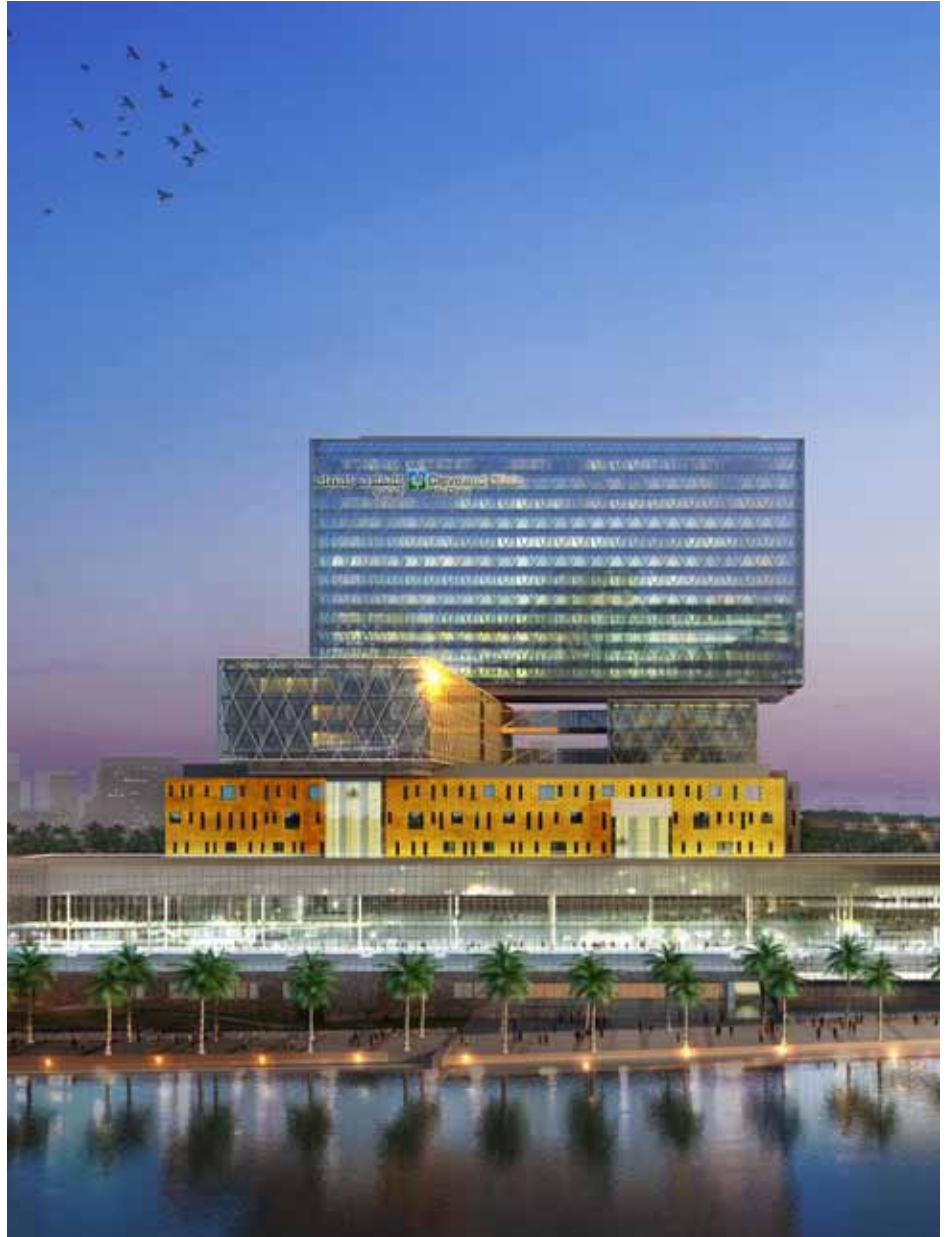

- building surveying
- cost management
- capital allowances consulting
- design management
- development management
- facilities management
- health and safety consulting
- legal support
- management consulting

- market intelligence
- people, place and performance consulting
- project management
- property consulting
- specification consulting
- sustainability consulting
- valuation services
- value and risk consulting

Inspiring solutions, enduring legacies

With a well-earned, worldwide reputation for excellence, creativity and thought leadership, our services are seamlessly integrated with AECOM's network of approximately 45,000 employees in approximately 125 countries. Our global network of professional technical and management support expertise enables us to call on a vast pool of knowledge, creativity and technical excellence around the globe.

We are ideally placed and equipped to help clients address the diverse challenges and opportunities confronting them and to deliver truly inspiring solutions and enduring legacies. Our construction consultancy expertise spans Africa, the Americas, Asia, Australia and New Zealand, Europe, and the Middle East

Understanding our markets and the industry, as well as appreciating the needs of our clients, underpins our search for value and certainty.

Our highly experienced research team delivers leading-edge knowledge about the latest trends in construction through in-depth reporting and research. We critically evaluate the impact of various economic and operational scenarios in global and local construction market trends — and deliver this to clients and colleagues to assist them in controlling costs and maximising value for their money on projects.

Combine this market intelligence with the detailed knowledge and experience of our project teams, sector-system specialists and other experts within the business, and you have a winning combination — a team that understands and can address present needs, but always has an eye on what's coming next so that the long-term requirements of our clients are never compromised.

In order to continue to offer the levels of excellence that our clients have come to expect, we are committed to being the employer of choice in our industry. Our clients have direct access to those individuals who are experts in their building requirements.

Creativity

Our creative application of our knowledge and experience is why clients consistently turn to us for consulting services. Our clients rely on our innovative project teams to come up with solutions to respond to the challenges, and make the most of the opportunities, that arise throughout the lifecycle of a project — from providing input on the business and investment strategy at the organisational level to identifying and advising on the ongoing operational efficiency of a built asset.

Our creativity is not about delivering new solutions for every client. Our experts — more often than not — deliver the best outcome for clients by simply applying elements of our varied technical expertise and knowledge base to achieve the desired result.

And, while our roots are in technical delivery, our clients also value the fact that our services always contain a strategic component. We operate beyond the project level and support our clients' long-term business plans and strategies.

As a leading provider of construction consultancy services, we strive to be the best-in-class in all that we do. To that end, Davis Langdon specialists provide a multitude of services customised to engage all project stakeholders in defining and achieving the maximum value for money.

Our teams are committed to outstanding quality of service delivery and have experience in working on some of the most complex and challenging programs and projects around the world. Our experience includes Tate Modern and the Eden Project in the United Kingdom; Estadio do Dragao in Portugal; New Doha International Airport in Doha, Qatar; Grand Egyptian Museum in Cairo, Egypt; the Gateway Bridge Upgrade in Brisbane, Australia; the Transbay Terminal in San Francisco, U.S.A.; the Gautrain Rapid Rail Link in Gauteng, South Africa; and the Cape Town Stadium in Cape Town, South Africa. We develop and maintain strong and

productive relationships with our clients, who include some of the most highly regarded and successful organisations around the world. We are committed to being the employer of choice in our sector. We attract, develop and retain the best talent in our industry. Our skilled professionals and the services we provide stand on a solid, proven foundation that emphasises knowledge, research, experience and professionalism.

AECOM is a global provider of professional technical and management support services to a broad range of markets, including transportation, facilities, environmental, energy, water and government. With approximately 45,000 employees around the world, AECOM is a leader in all of the key markets that it serves. AECOM provides a blend of global reach, local knowledge, innovation and technical excellence in delivering solutions that create, enhance and sustain the world's built, natural and social environments. A Fortune 500 company, AECOM serves clients in more than 130 countries and has annual revenue in excess of \$8.0 billion. More information on AECOM and its services can be found at www.aecom.com
