

Environmental Policy Statement

Davis Langdon, an AECOM Company, is a global provider of program, cost and consultancy services. We offer a blend of global reach, local knowledge, innovation, and technical excellence in delivering solutions that create, enhance and sustain the world's built, natural, and social environments. We achieve this through working with our clients, as well as through addressing our own operations.

Dedicated to Sustainability

We are committed to reducing our environmental impacts. This is to be achieved by the application of innovation and expertise to uphold the high standard of professional services which we deliver to our clients.

Complying with Legislation & Preventing Pollution

We are committed to identifying and continuously improving our environmental performance and preventing pollution. We will comply with all relevant environmental legislative requirements and, where they exist, appropriate industry guidance and voluntary agreements. Through our project work and expertise we aim to identify significant environmental issues while providing technical and managerial solutions.

Working with Clients

We will seek to encourage clients to adopt low environmental impact and sustainable solutions where feasible and we will engage in industry discussions to further environmental debate and understanding.

Our Operations

We have identified the environmental aspects and impacts of our operations and endeavour to reduce our carbon emissions and to use our offices and activities as examples of good environmental practice. We extend our commitment to our supply chain, with which we work collaboratively to encourage environmentally responsible behaviour.

Using Energy Efficiently & Reducing Carbon Emissions

We are committed to:

- Reducing the environmental impact arising from energy consumption of our operations;
- Promoting the use of clean, energy efficient sustainable technologies in our designs.

Reducing Transport Impacts

We are committed to:

- Reducing the need for travel in our own operations and when advising clients;
- Encouraging the use of the most sustainable methods of travel including public transport, car sharing and cycling for business and commuter travel.

Managing Material Use and Waste

We aim to use resources efficiently in our office operations and projects by following the waste hierarchy - eliminate, reduce, re-use, recycle by:

- Seeking to avoid the use of natural resources;
- Identifying opportunities to reduce significant material use;
- Encouraging the re-use of materials;
- Promoting the most efficient waste management option;
- Encourage the use of recycled materials.

Environmental Management

This policy applies to all Business Lines and services, is communicated to all staff and supported by an Environmental Management System through which we work towards objectives and targets.

John Hicks,
Managing Director, Europe
